SEATS AHEAD

Mesh Chairs

Seats Ahead has been selling Mesh Back chairs for over 20yrs. To cover a wide range of function, style and price the Seats Ahead range is now extensive. We believe that our range is the widest available from any manufacturer/importer in Southern Africa. All items carry guarantees and are supported by high stock levels.

There are many reasons for the increase in popularity of this "Style" of chair.

Ergonomics
Mesh Back chairs boast ergonomic excellence, with a design that mirrors the natural curves of the spine. As you sit, the chair intuitively adjusts to your unique shape, providing customised support and comfort that's tailored just for you.

Ventilation
The mesh back design facilitates superior airflow, creating a cooling effect that keeps users comfortable and dry. By allowing air to circulate freely, these chairs reduce perspiration and discomfort, providing a more enjoyable sitting experience.

Hygienic
Mesh chairs are low-maintenance, featuring an easy-to-clean design that outshines fabric counterparts. The versatile mesh resists stains and odors. The mesh material promotes airflow, reducing perspiration and absorption, while also allowing for easy vacuuming and cleaning of spills.

Modern style
Mesh chairs bring a touch of modern sophistication to any office setting, blending seamlessly with contemporary furniture to create a stylish and sophisticated atmosphere.

Durability
The tight woven mesh ensures exceptional strength and durability. Mesh chairs retain their sleek appearance and performance for years to come, looking like new even after extended use.

Environmentally preferable.
Mesh and mesh backs are made from materials that are not only recyclable but can also be manufactured using a significant percentage of recycled content. This eco-friendly approach reduces waste and minimises the environmental impact of production, making mesh chairs a sustainable choice for modern workspaces.
